

Current role	React Developer at Inspeerity
Technologies	React, TypeScript, Redux, Cypress, JIRA, Git, Next, JavaScript, CSS, HTML, Firebase

Right now I'm learning... advanced concepts of TypeScript and React. I'm also learning Tanstack React Query and experimenting with Cypress to strengthen my testing capabilities.

Work experience

React Developer, Inspeerity  Mar 2024 – Present (3m)

One of the fastest-growing Polish software house.

- React
- TypeScript
- Redux
- Cypress
- JIRA
- Git
- Next

- Accomplished the creation of front-end solutions that exceeded strategic objectives by using advanced JavaScript, TypeScript, and React techniques, resulting in enhanced user experience and client satisfaction.
- Developed web-based applications by following provided designs and specifications, resulting in timely delivery and high-quality products.
- Worked alongside Back-End developers to develop end-to-end implementations of websites and web-based applications, resulting in seamless integration and functionality.
- Utilized Git for effective collaboration and code management in the team, resulting in streamlined workflows and reduced conflicts.
- Reduced maintenance costs through code refactoring.
- Enhanced application performance by resolving bugs.

Junior Frontend Developer, Inspeerity  Dec 2021 – Mar 2024 (2y 3m)

- React
- TypeScript
- Redux
- JavaScript
- Cypress
- JIRA
- Git
- Next

- Developed and maintained React and Next.js applications using Scrum methodology to ensure agile project completion.
- Collaborated with cross-functional teams to enhance software development understanding, boosting team synergy and productivity.
- Implemented state management with Redux and React-Query technologies to enhance application performance.
- Utilized Git for streamlined collaboration and code management in team projects, ensuring efficient version control and conflict resolution.
- Boosted application performance by rectifying software issues and updating and upgrading legacy code.

Junior Frontend Developer, Enterosoft.com  Feb 2021 – Oct 2022 (1y 8m)

- React
- CSS
- TypeScript
- HTML
- Firebase
- JIRA
- Git
- Next

- Developed an in-house application to provide multilingualism for apps and websites.
- Created dynamic, browser-compatible web pages by using HTML5, CSS3, JavaScript ES6, TypeScript, Gatsby, and Next.js, resulting in robust and responsive web applications (i.e. built the website of the

company (<https://enterosoft.com/en/>)

- Built and maintained single-page applications using React, resulting in fast and interactive user interfaces.
- Utilized Git for effective version control and smooth code management and collaboration.

Education

INFOSHARE ACADEMY, GDANSK, POLAND

Feb 2020 – Sep 2020 (7m)

Junior Frontend Developer

- Completed a rigorous seven-month, 480-hour intensive course in Front-End Technologies, guided by top industry experts, including Atlassian employees.
- Acquired comprehensive knowledge and practical skills in Agile Scrum, HTML, CSS3, JS, TS, React, BEM, REST API, REDUX, and Firebase.

More about me

My favourite technology is...

a combination of TypeScript and React and Tanstack React Query. I appreciate their efficiency and flexibility, and how they facilitate the creation of robust, scalable web applications.

Right now I'm working as...

mid-react developer. I am focused on the implementation of new features as well as solving bugs. I closely cooperate with backend developers to find the best solution for the application.

In 3-5 years I want to be...

a proficient software developer, contributing to innovative projects and leading a team in the tech industry.

Interests

Beyond coding, I relish diving into sci-fi books, watching intriguing TV series and movies, and maintaining a consistent fitness regimen at the gym. These activities fuel my creativity.

I want to work for a company that...

prioritizes technological advancement, promotes a culture of collaboration and continuous learning, and supports the professional and personal growth of its employees.

I'm making a career change because...

I have moved to the USA and see a great opportunity to enhance my coding skills and immerse myself in a new work culture within the tech industry.

Right now I'm learning...

advanced concepts of TypeScript and React. I'm also learning Tanstack React Query and experimenting with Cypress to strengthen my testing capabilities.
